

Artists of Macedon are opening their studios over the fourth weekends of April and November.

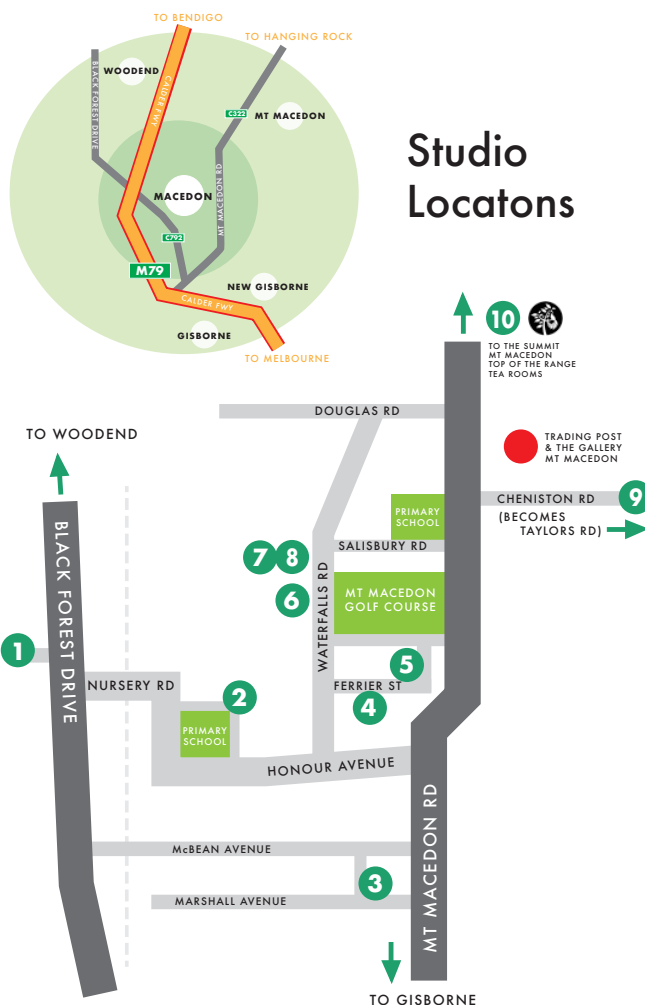

These studios, set within a short drive of each other, will feature artists at work who will demonstrate and discuss how they approach their medium. They will have original works on display and for sale.

Macedon/Mt Macedon is steeped in history, spectacular gardens and creativity. You'll be amazed by the rich diversity of art in the area.

The artists invite you to share their inspiration and creations as you embrace arts and culture in the beauty and tranquility of our environment.

I work with acrylic, mixed media and hot and cold wax techniques. My process involves improvising with colour and texture in an abstract way, working intuitively with the characteristics of the medium.

I love the immediacy and deceptive simplicity of drawing with pencils. Drawing is both challenging and meditative. Using the most basic of drawing implements I can capture a moment in time.

I apply images and textures onto clay for surface decoration and storytelling. Screenprinting, print transfer, stenciling and embossing are some of the techniques I use to create vessels and small sculptures.
